

Origin Logo Assets

Five PNG lockups of the ORIGIN wordmark + icon mark live in this folder. Each is **1500 × 300** px, transparent background (rendered from the source SVGs in the Origin brand folder; upload these PNGs to the PowerPoint plugin). The **wordmark** (the letters) and the **icon mark** (the dot cluster on the left) are colored independently across variants.

Pick by background, not by taste: a logo must contrast with the surface it sits on.

Dark-on-light (use on LIGHT backgrounds — **#F4F3EF**, white, light cards)

File	Wordmark	Icon	Appears as	Notes
origin-logo-02.png	Black #141712	Green #ADFF26	Lime-green icon + solid black wordmark	Primary light-mode logo. Full color. Default for light slides.
origin-logo-01.png	Black #141712	Black #141712	Entirely solid black	All-black monochrome. Use when full color is unwanted (one-color print, watermark).

Light-on-dark (use on DARK backgrounds — Charcoal **#222F2E**, Logo Black **#141712**)

Note on #F9FFEE: it is a near-white tint. On a dark slide it reads as crisp off-white; on a white background (e.g. a browser file:// preview) it looks washed-out — like a faint, **half-opacity lime**. That is expected — **04** and **05** are meant for dark surfaces only.

File	Wordmark	Icon	Appears as	Notes
origin-logo-04.png	Off-white #F9FFEE	Green #ADFF26	Solid lime icon + pale/off-white wordmark (looks like half-opacity lime on white)	Primary dark-mode logo. Full color. Default for title / section / closing slides.
origin-logo-05.png	Off-white #F9FFEE	Off-white #F9FFEE	Entirely pale/off-white (looks like half-opacity lime on white)	All off-white monochrome. Use when full color is unwanted.
origin-logo-03.png	Green #ADFF26	Green #ADFF26	Entirely solid lime green (icon + wordmark)	All-green monochrome. High-impact accent on dark; use sparingly — lower-contrast wordmark, avoid at small sizes.

Quick rule

- **Light slide** → **origin-logo-02.png** (full color) or **origin-logo-01.png** (mono).

- **Dark slide** → [origin-logo-04.png](#) (full color) or [origin-logo-05.png](#) (mono).
- Never put a light-on-dark variant on a light background, or vice versa — the wordmark disappears.
- The icon mark is bright green [#ADFF26](#) in the full-color variants; this works on both light and dark, but the **wordmark** is what determines readability, so choose by the wordmark color.

Paths (co-located in this folder)

```
./origin-logo-01.png    (mono black,          light bg)
./origin-logo-02.png    (black + green,       light bg – PRIMARY)
./origin-logo-03.png    (mono green,           dark bg)
./origin-logo-04.png    (white + green,       dark bg – PRIMARY)
./origin-logo-05.png    (mono near-white,    dark bg)
```

Sizing & placement (ties to [pp-style-guide.md](#))

- Maintain the native 5:1 aspect ratio — never stretch. Scale by width.
- Content slide (light): bottom-right, width $\approx$ 144 pt → [origin-logo-02.png](#).
- Title / section / closing slide (dark): top-left of the dark area, width $\approx$ 200 pt → [origin-logo-04.png](#).
- Clear space: keep at least the icon-mark's width of empty space on every side.
- These PNG lockups replace the typed "O ORIGIN" placeholder described in the style guide — prefer the asset whenever the tool can place an image; fall back to typed text only when it cannot.
