Gray 300	#E3E2D9
Light	#F9FFEE

Origin Identity Brand Colors

Name	Hex
Logo Green	#ADFF26
Logo Black	#141712

Usage notes

- **Logo Green #ADFF26** is a bright lime. It has high contrast on dark surfaces but **fails as text on light/near-white backgrounds** — use it as a fill, accent strip, or text-on-dark only. For green-colored text on light slides, substitute Logo Black #141712 or Charcoal #222F2E.
- **Logo Black #141712** is the deepest brand tone — use for primary text on light surfaces and for component dark fills.
- **Charcoal #222F2E** is the dark-mode background.
- Accent colors are a sanctioned categorical palette (Navy / Purple / Fire / Blue / Brown). Use them only to differentiate categories; never as decoration. **Fire #FF4B00** doubles as the negative/error signal; **Blue #0076FF** as informational.
